

CR-Pro Shipping Crate Instructions

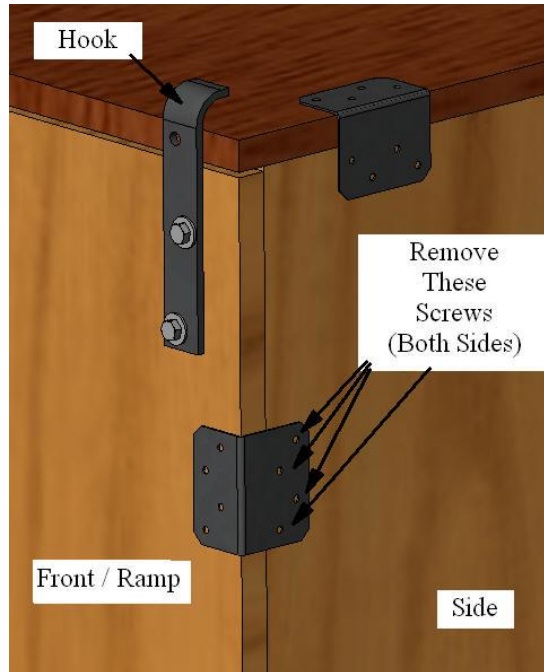

---Mark Smith---

Setting up the Ramp

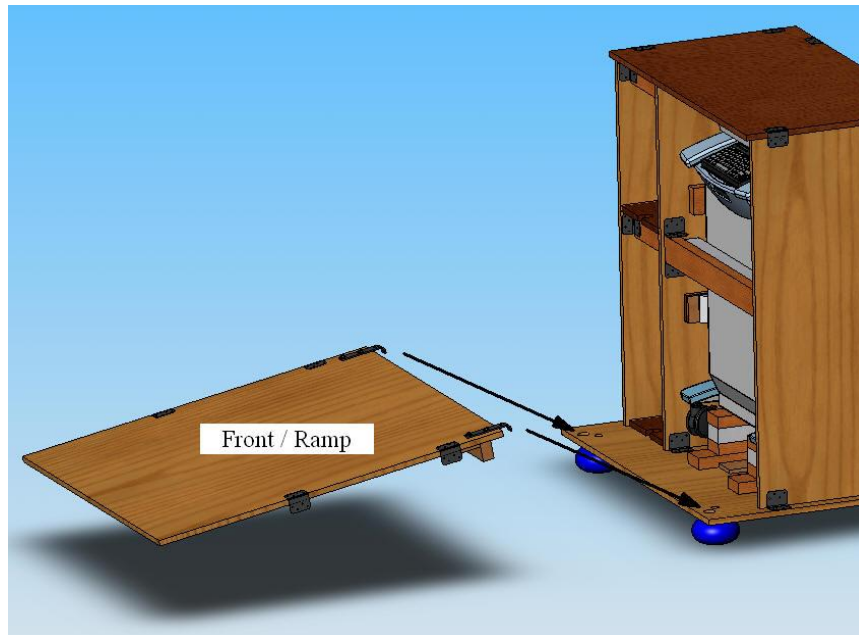

The shipping crate comes with a built-in Ramp to facilitate removal of the CR-Pro.

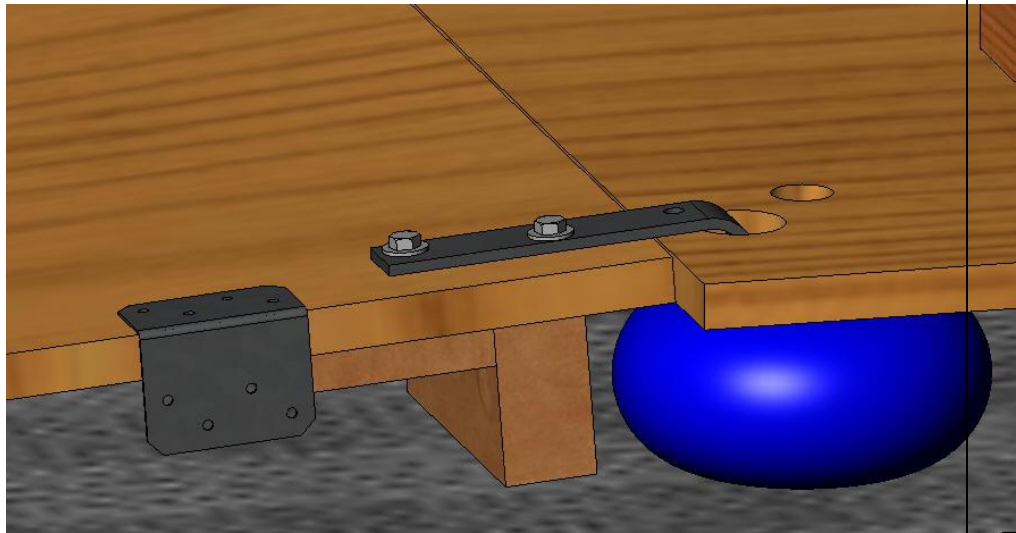

There are 4 brackets that hold the Front/Ramp on. Remove only the screws on the sides, leaving the metal brackets attached to the Front/Ramp.

Remove the Front/Ramp, swing it down, and...

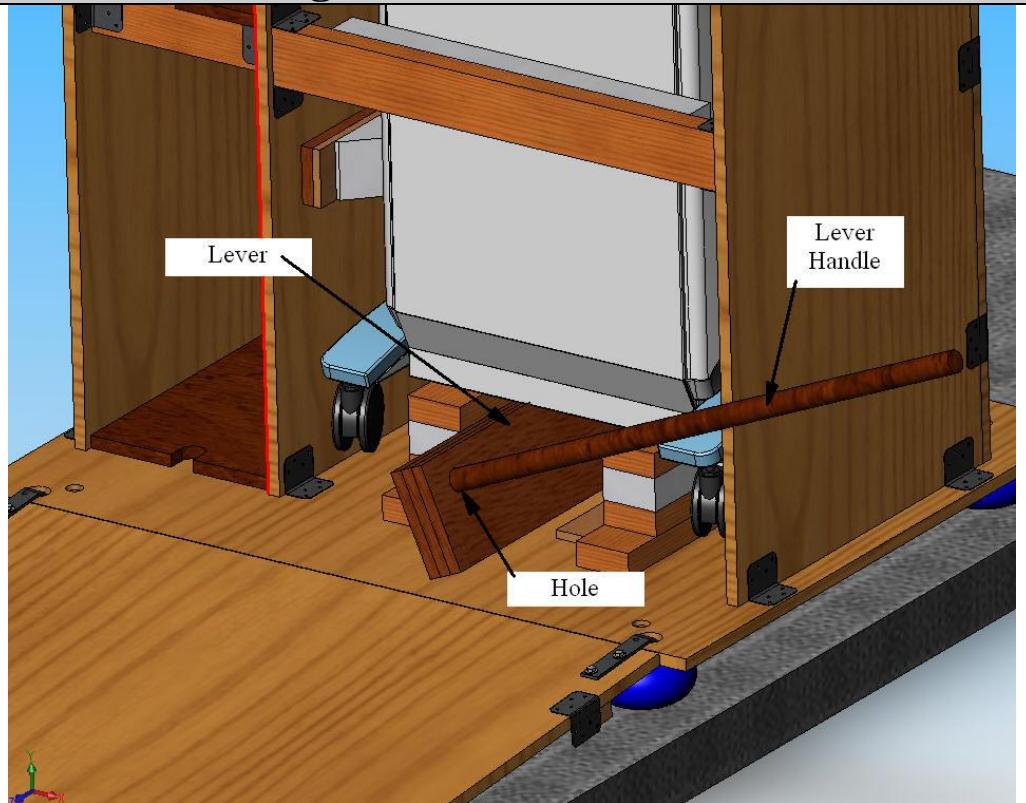

insert the Hooks
into the holes as
shown.

Removing the CR-Pro

Insert the Lever under the middle of the CR-Pro, as shown. Then insert the Lever Handle into the hole.

Press down upon the Handle, thus elevating the unit.

Remove the two Shipping Supports, and the Shipping Foam piece (not shown) which was on top of the supports before their removal.

Then raise the Handle up, and gently lower the unit onto its wheels.

Roll the unit carefully down the Ramp.
